

**FOSTER
SUPPLY, INC.**

TIED REBAR BY FOSTER SUPPLY

We tie all our bar with galvanized ties so that they can be stock piled on job site without for long periods without fear of damage to ties.

Foster Supply not only details and fabricates your bar for you, but we can also pre-tie many different types of configurations before shipping to the job. The tied rebar will come to your site in manageable sections, and you will be provided a placement drawing to help you finish your job as quickly as possible. In most cases it will be much more cost effective for us to tie your rebar for you because we have access to many more options in the shop than out on a jobsite. weather is also not a concern for us. If you are interested in a price on tied rebar call (304) 755-8241 and ask for Ryan Holmes.

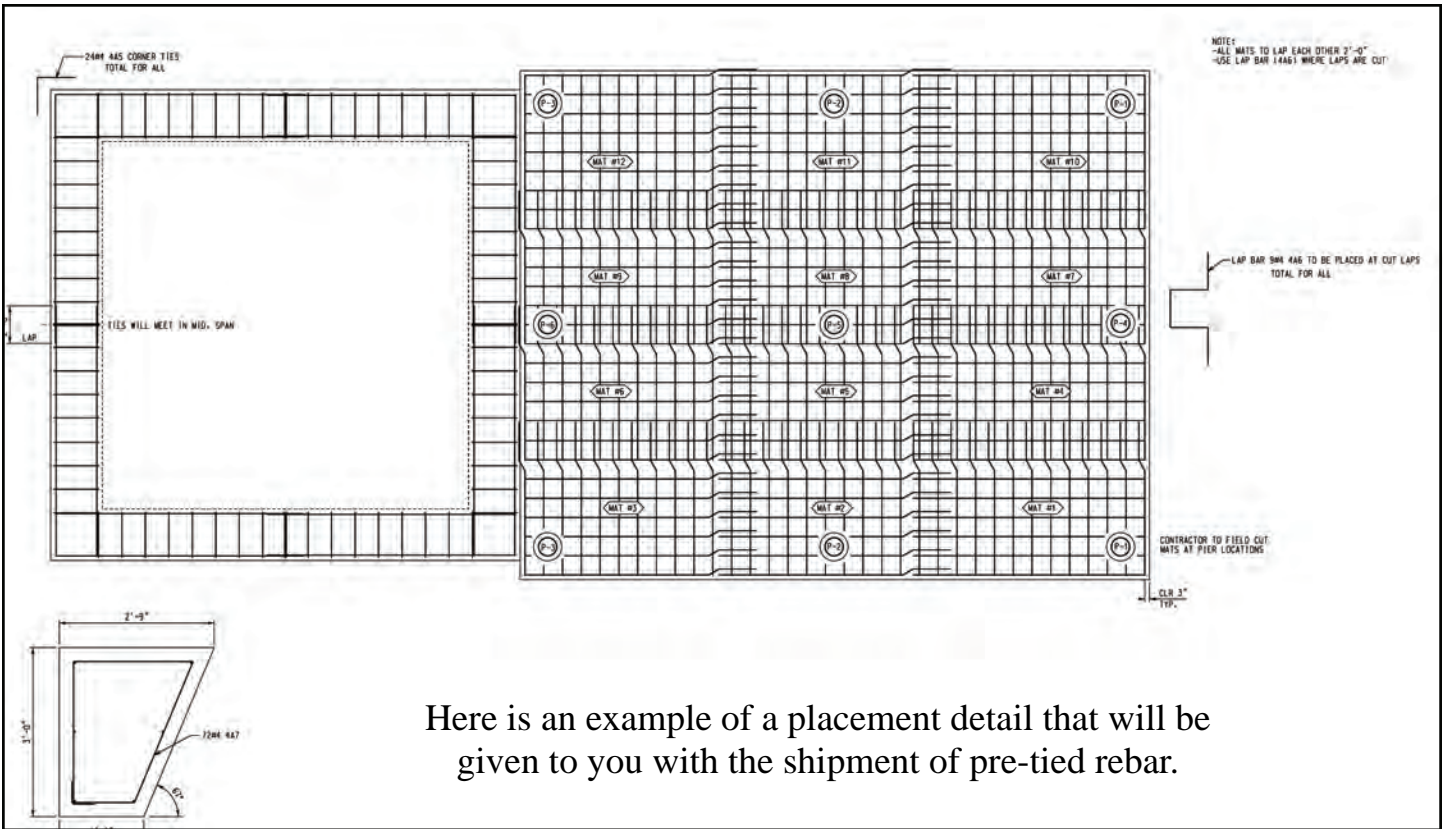

Our only real limitation when it comes to pre-tying your rebar is the size of our trucks, but in most cases we can just change the size of the rebar mats to accommodate for this. Contact us if you have any questions.

Here is an example of a placement detail that will be given to you with the shipment of pre-tied rebar.

Another way we can make your job easier is for us to pre-tie the slab bolsters onto and in between mats for you so that they do not have to be shipped and installed on site.

Commonly Pre-tied items

- Smaller size mats and Pads
- Piers
- Caissons
- Footers
- Other Complex shapes
- Grade beams
